# Microfiber Cloths, Pads, and Specialty Cleaning Tools

Using microfiber pads is the thorough way to clean patient room floors. Pads, sticks, and frames weigh much less than traditional mopping equipment.

Cleaning with microfiber uses less water, less chemicals, and less time. Microfiber pads last at least 3 times longer than standard mops.

Microfiber collects more dirt and germ-related materials than traditional mopping methods.

Use microfiber products with your existing Royce Rolls equipment or try out our SQZ-BIN (page 6) or MST/LST Systems (pages 4-5) for a new way to handle your pads.
